

# World Climate

## Tropical climates

- Rain forest
- Savannah

## Dry climates

- Desert
- Steppe

## Temperate climates

- Warm with dry winter
- Warm with dry summer
- Humid with hot summer
- Humid with cool summer

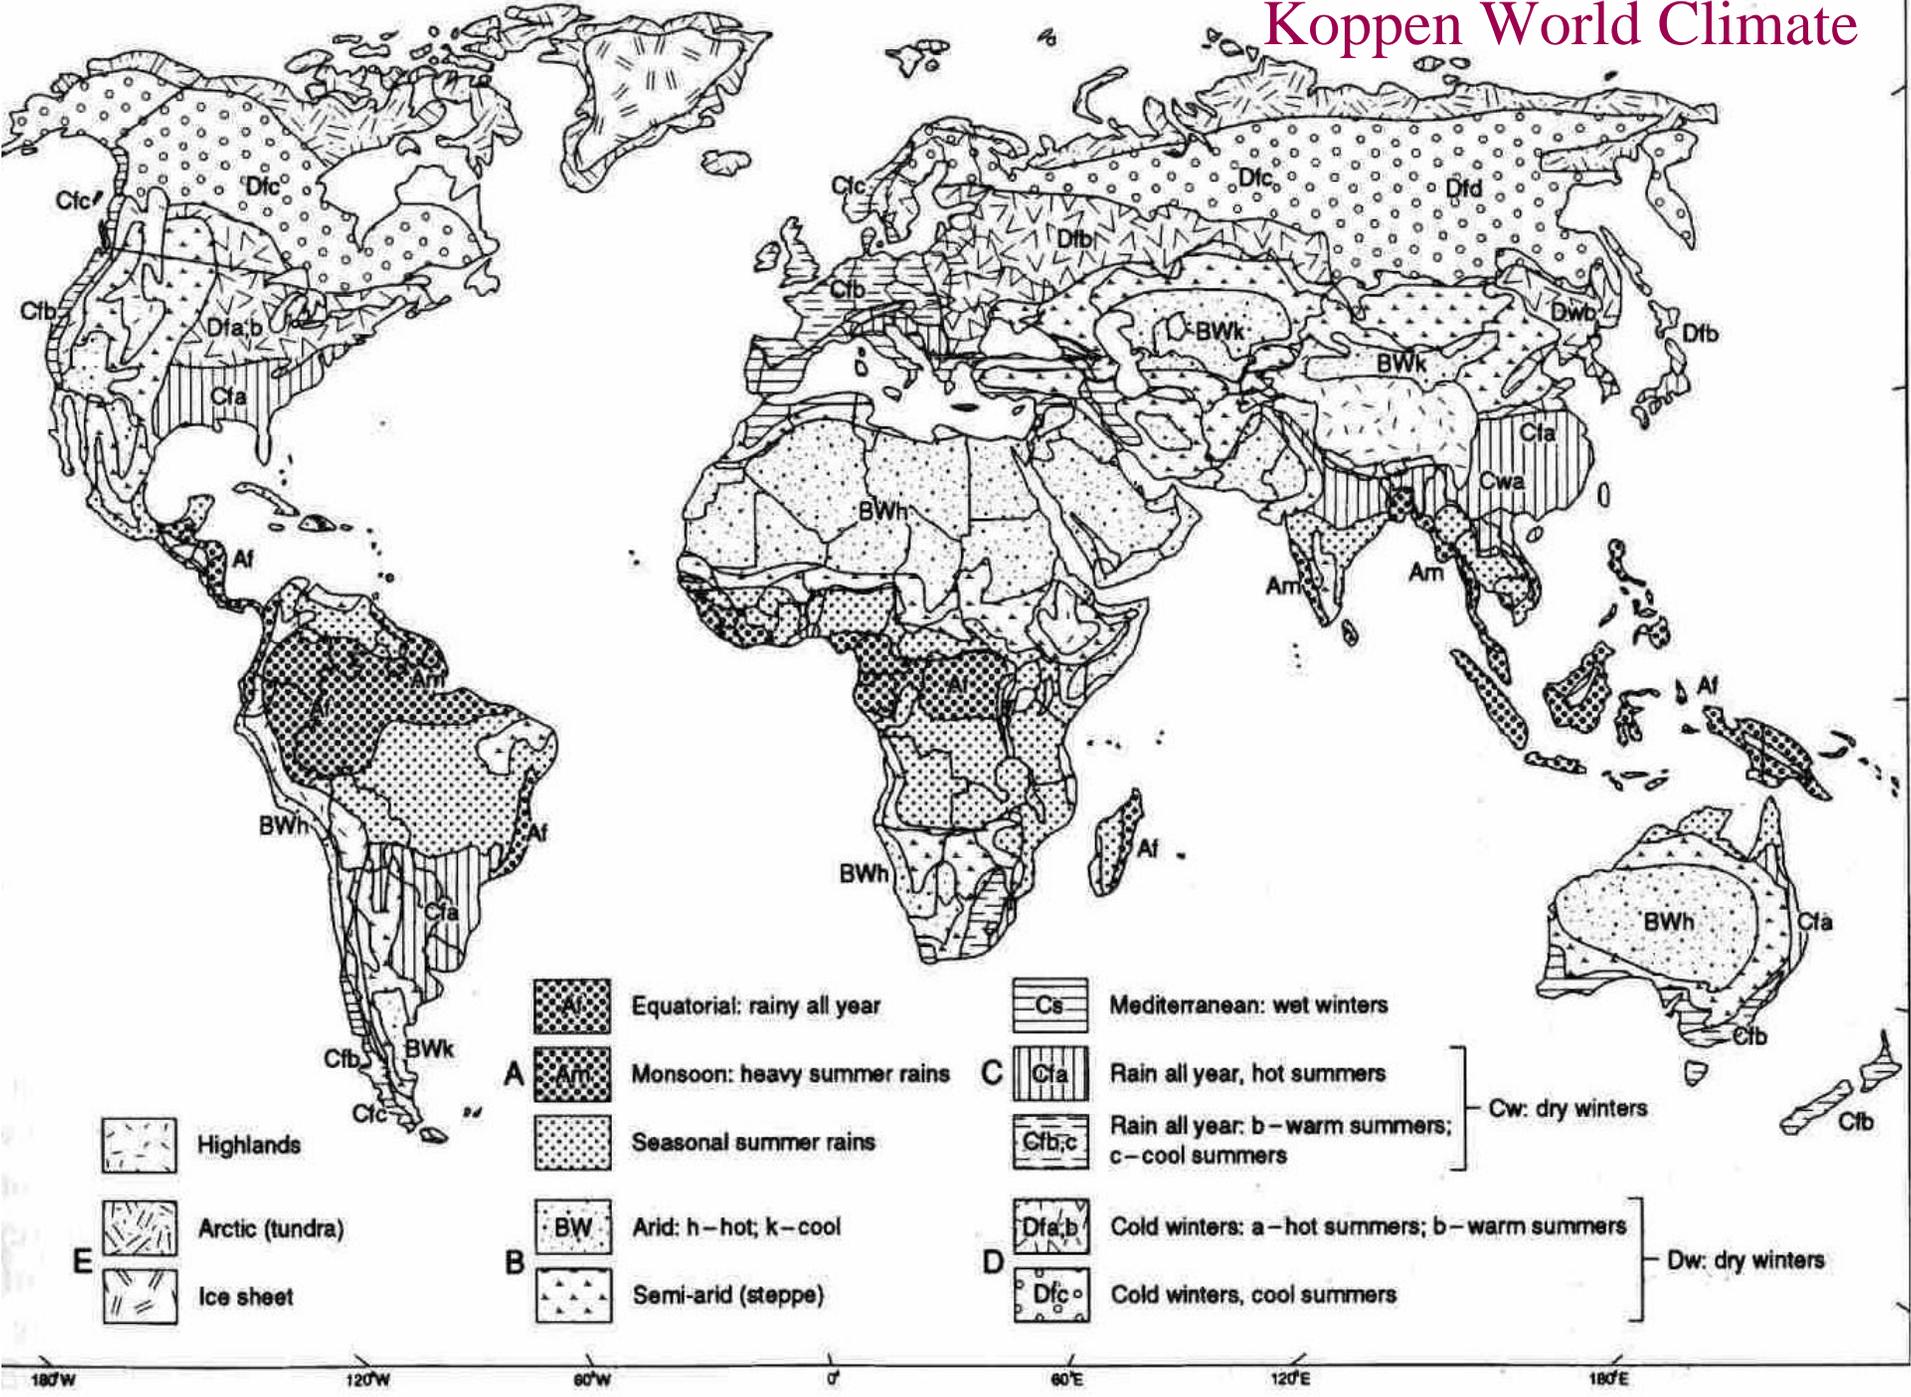

## Continental climates

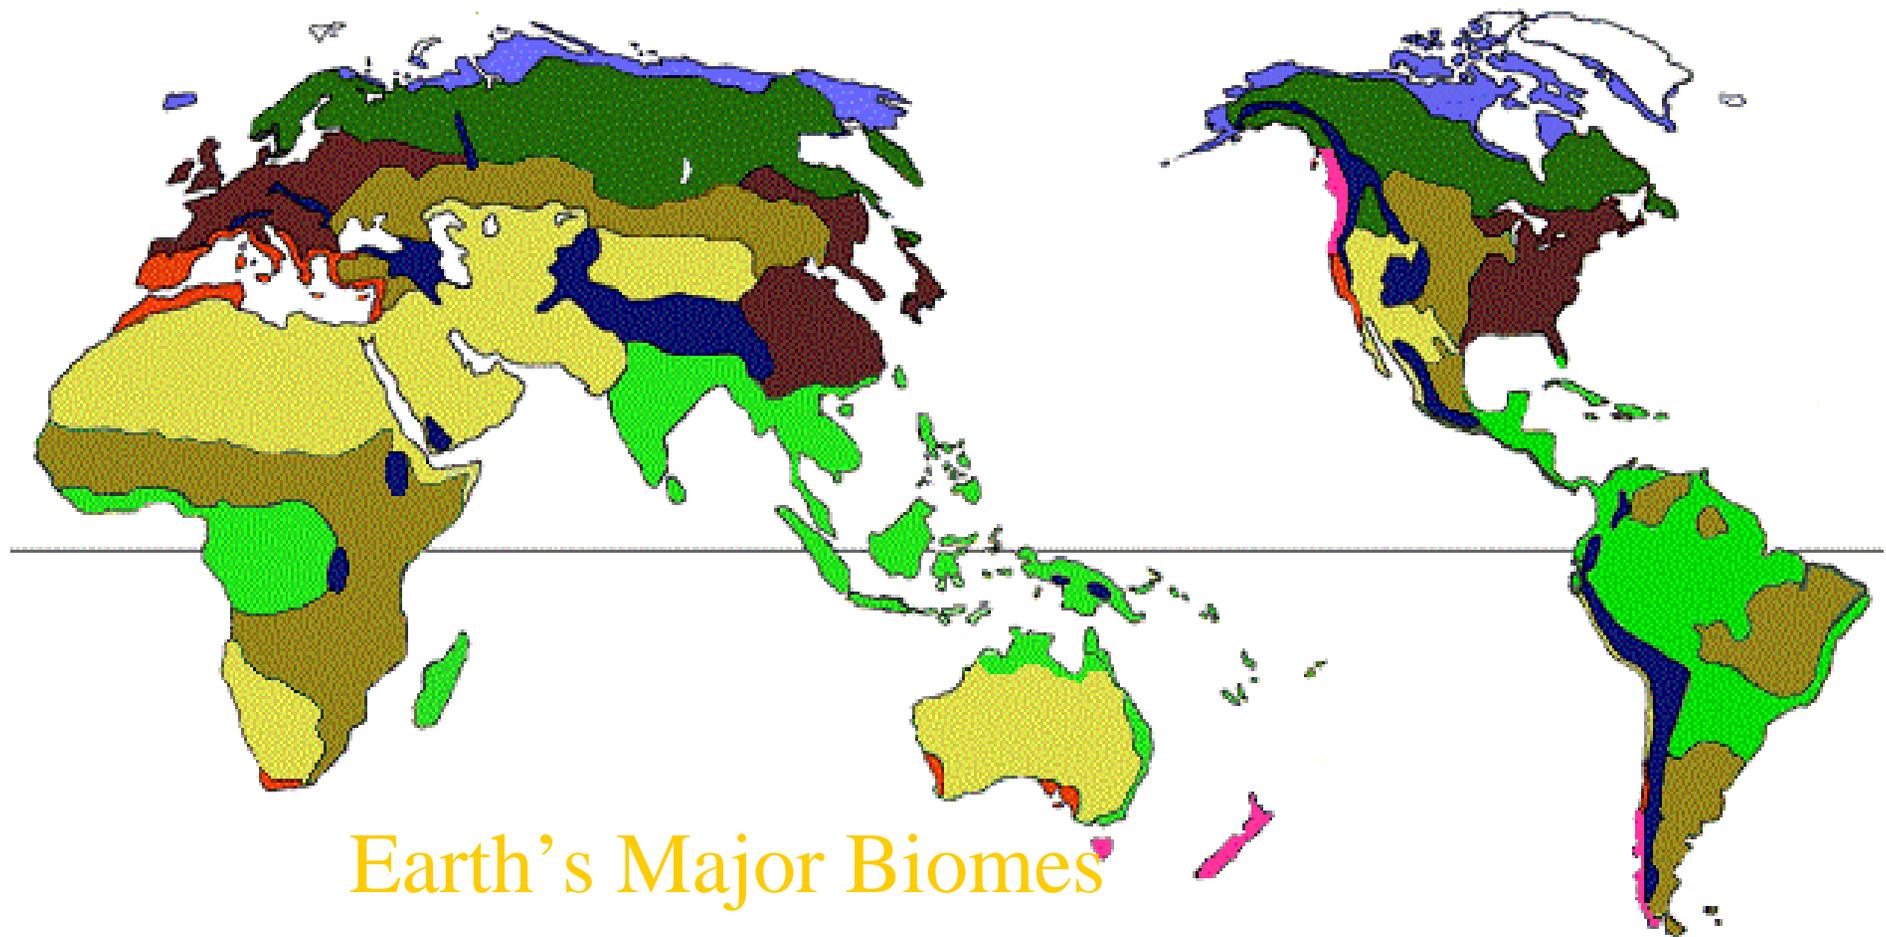

- Cold winter
- Cold, wet winter
- Cold, dry winter

## Polar & mountain climates

- Tundra
- Perpetual frost

# Koppen World Climate

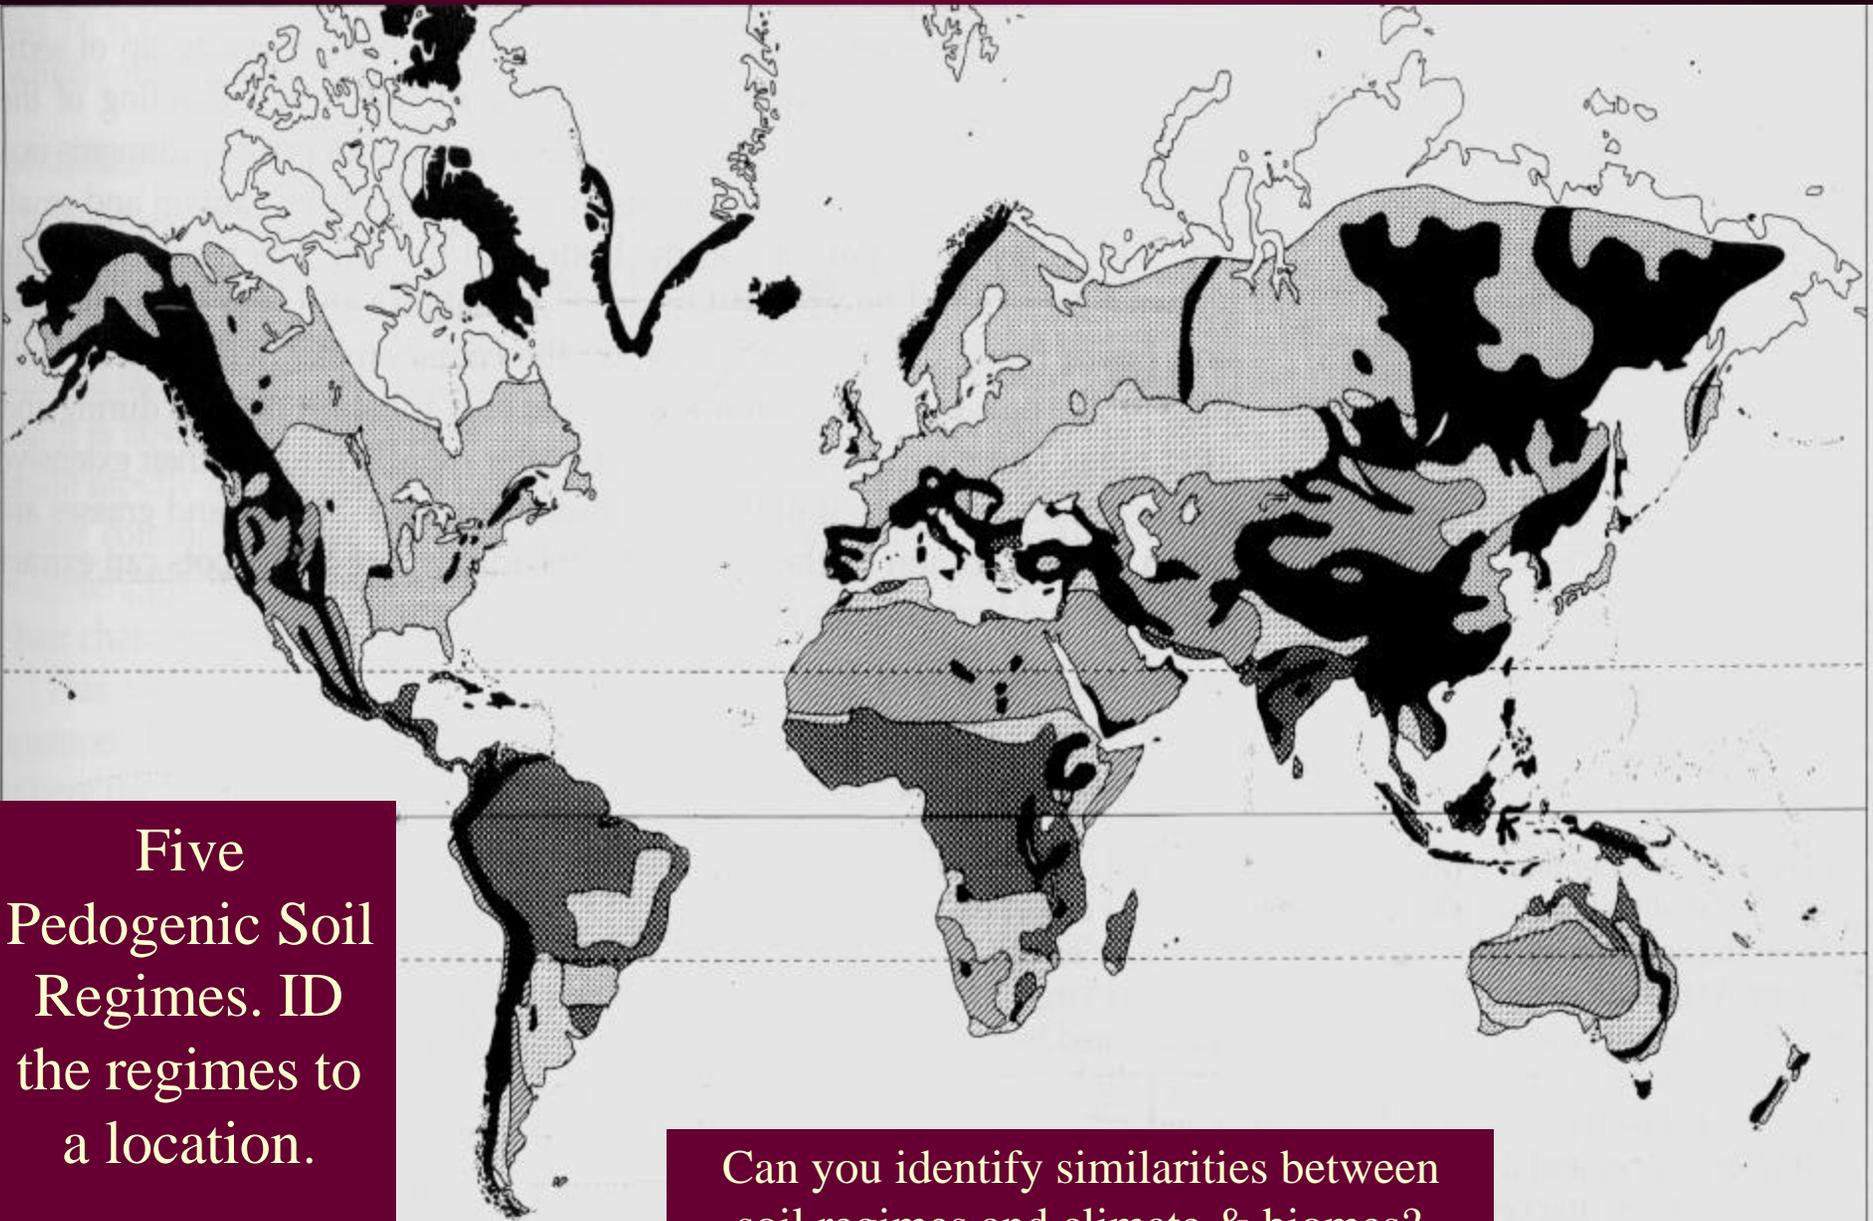

## Earth's Major Biomes

Biomes are the major regional groupings of plants discernible at a global scale. Their distribution patterns are strongly correlated w/ regional climate & identified according to major vegetation type.

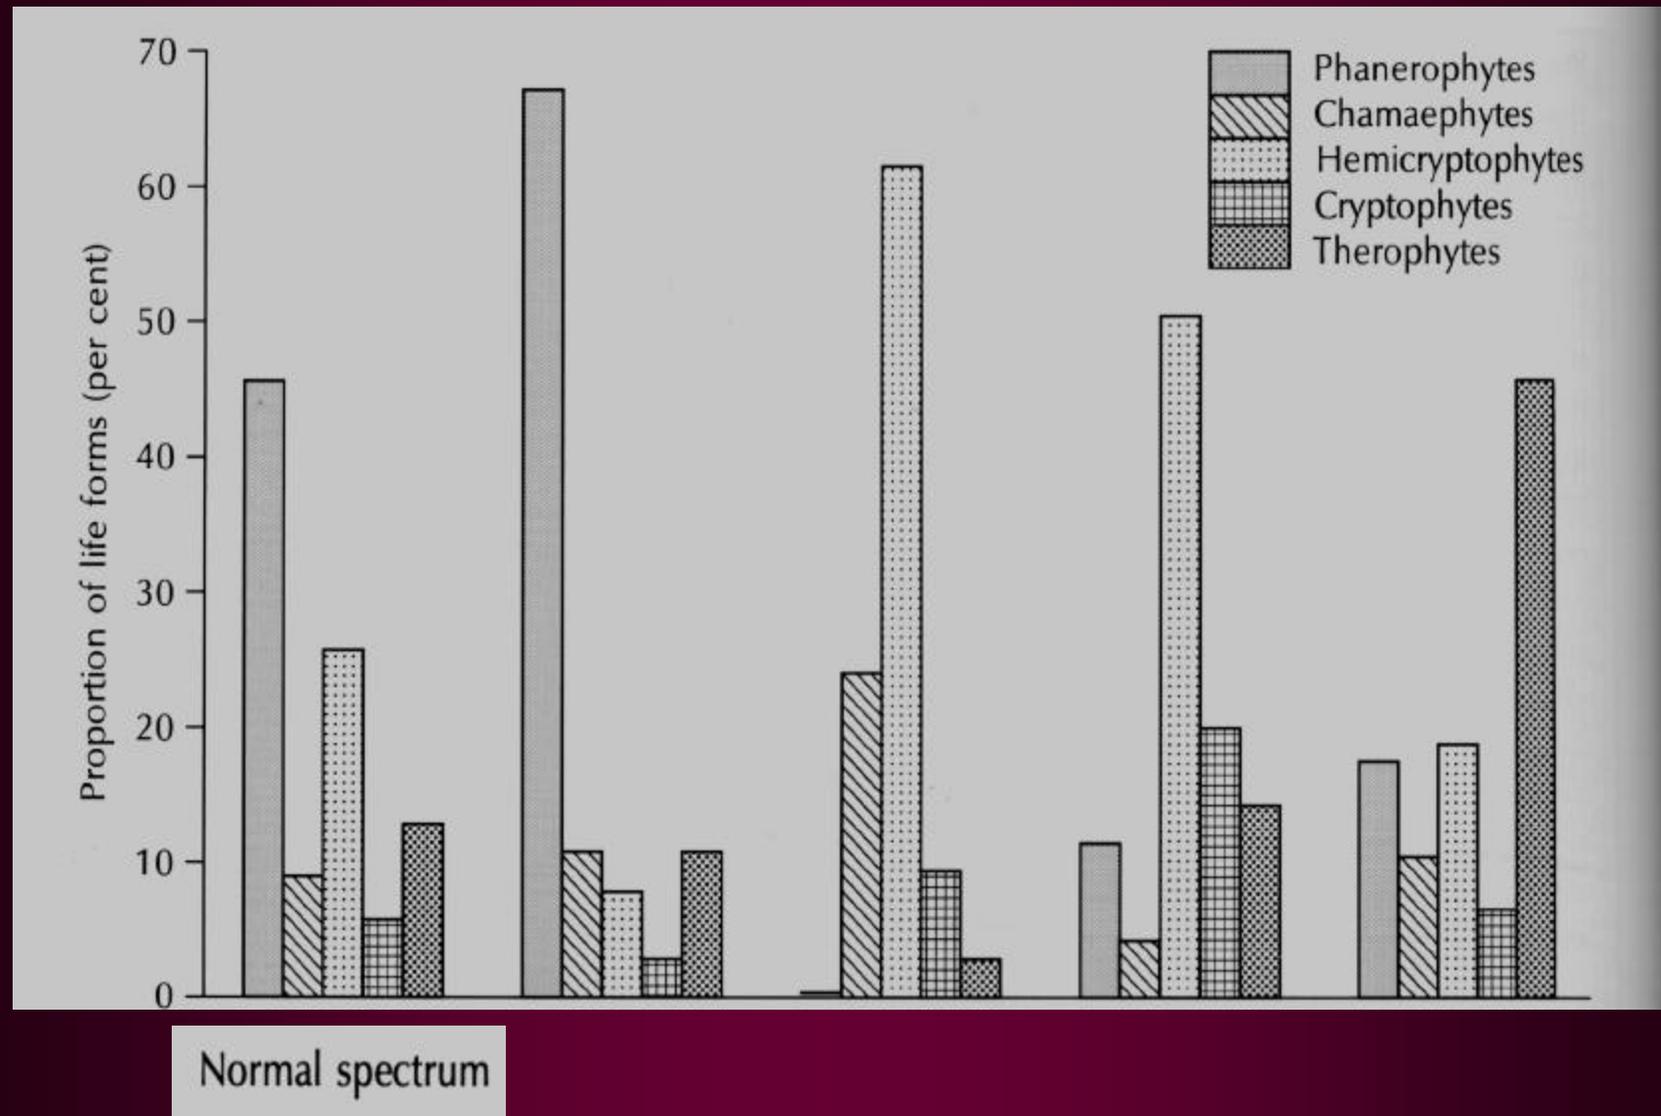

# Pedogenic Soil Regimes

Five  
Pedogenic Soil  
Regimes. ID  
the regimes to  
a location.

Can you identify similarities between  
soil regimes and climate & biomes?

# The Proportion of Plant Life Forms in Major Biomes or Ecozones

Label each life-form grouping with the appropriate major biome: desert, tundra, temperate, tropical – explain.
