Notes:
1. The hand doing the block or strike is always on the same side as the forward foot.
2. You turn in the direction of the hand doing the strike, except after the Kiai when you turn the opposite way.

You start at the bottom center facing the top. You must do both sides of the bottom, go up the middle, do both sides of the top, go back down the middle, do both sides of the bottom again and end up where you started from.
